

African swine fever (ASF) is not a danger to humans but kills domestic and wild pigs. There is no vaccine against it.

The virus is highly resistant in the environment and in pork products.

Carelessness can spread the disease.

## **Respect general** PRECAUTIONS

**Declare any suspicious** case (dead or alive) to the Veterinary Services

Do not carry pigs or pork products. If you do, declare them to the authorities

When working in or visiting farms, respect biosecurity measures

Do not visit pig farms in affected areas

## **AFRICAN SWINE FEV**

## Don't be the carrier ~ of a deadly pig disease 3

## TRAVELLERS

Do not carry the ASF virus by transporting pigs or carrying pork products.

Know the countries infected with ASF and systematically check for travellers carrying animals or animal products, in particular pigs or pork products.

your equipment before

leaving the hunting area.
